

predefined first stations if the first station has made a connection request based on the location of said at least one station.

16. A system as claimed in any preceding claim, wherein a second station satisfying the location criteria receives a message indicating that a first station wishes to make contact therewith.

17. A system as claimed in claim 16, wherein the second station receiving said message is arranged to indicate if the call is to be accepted.

18. A system as claimed in any one of the preceding claims, wherein said connection request also comprises information identifying at least one second station and a call is made between said first and the identified at least one station only if the location criteria is satisfied.

19. A system as claimed in claim 18, wherein if the second station does not satisfy the location criteria at the time the connection request is made, the system is arranged to make the call at a subsequent time when the second station satisfies the location criteria.

20. A system as claimed in any preceding claim, wherein the first station and/or at least one of said second stations is a mobile terminal.

21. A system as claimed in any preceding claim, wherein said first station and/or at least one of said second stations is a fixed terminal.

22. A method for use in a telecommunications system comprising a first station and a plurality of second stations, the method comprising the steps of:

09883792 0022004
09883792 0022004

defining at the first station a location criteria to be satisfied by at least one second station;
requesting a connection with at least one second station satisfying said criteria;
determining which of said second stations satisfy said criteria;
and
establishing a connection between said first station and at least one second station satisfying said location criteria.

23. A telecommunications system comprising a first station and a plurality of second stations, the first station being arranged to request a connection with at least one of said plurality of second stations, said connection request comprising a location criteria to be satisfied by at least one second station.
